

THE TRIFORCE PLUSH

A SEWING PATTERN BY

THE TRIFORCE PLUSH

This plush is of course inspired by the great Triforce from The Legend of Zelda games. It's a super simple project to keep on your desk, or consider enlarging the pattern to make it into a pillow!

DIFFICULTY: 

Super simple to get through! The points of the triangle are a little tricky, but if you use fleece it makes it easier.

MAKES:

one 7" x 7" plush

MATERIALS & TOOLS

- ¼ yd. of yellow fleece
- 1/8 yd. or a 6" x 10" scrap of black fleece
- Batting
- Matching sewing thread
- Basic sewing tools (sewing machine, scissors, iron, needles, pins, fabric marker, seam ripper)

BEFORE YOU BEGIN:

1. Print out the project pattern, page 5
2. Lay out the pattern pieces on your fabric and cut them out
3. Mark the fabric pieces with the guidelines from the pattern

SEWING TUTORIAL

1

Begin by sewing one of the Triforce center pieces to one of the Triforce corners. Line up the edge of the center along the edge of the corner with the square markings. The ends should match up with the square markings so the edge is perfectly centered. Sew the two pieces in place.

2

Now you'll need to repeat this with the other sides of the Triforce center and two more Triforce corners. Again, make sure the edges are lined up with the square to get the proper centering. Repeat this with your final Triforce center piece and the remaining 3 Triforce corner pieces. So you now have a front and back Triforce :)

SEWING TUTORIAL

You'll notice at each point of your Triforce center you have a little extension where two Triforce corners meet, but aren't connected. Well, we're connecting them! Match up the edges and sew them together. The trick here is to sew all the way up to your previous seam from step 1. Try to stop exactly on the same point as where the previous seam begins, and no further. This will make your triangle look the cleanest when the project is finished. Repeat this with the back side of your Triforce.

3

Now to really start giving this thing some shape :) Layer your back and front Triforce pieces together with the right sides facing each other. Along one side mark about a 5" line that's centered along the edge (it doesn't matter which side, they're all equilateral). This is going to be your opening later for when you turn the plush right side out. Now you can sew your front and back together along those straight edges, and just be sure to skip over that line so you'll have an opening. Also skip over the corners, as we'll be sewing those next.

SEWING TUTORIAL

5

Time for the corners! Fold the body of your Triforce at an angle to match up the side seams you've just sewn, and you'll see those openings in the corner lie flat to make a straight edge as you see in the picture. Sew these edges together and now you'll have some depth to your plush. Of course don't forget to do this with the other two corners, so now you have a fully formed triangular prism!

6

Now turn your plush inside out and poke the corners nicely with a chopstick, or even your fingers would do fine. Stuff it semi-firmly so that it doesn't look too round and still maintains its triangular shape. Make sure the corners are stuffed really well though to give them some good definition! To finish, turn under the seam allowances in the opening you made and sew the opening together with a ladder stitch. Now give your plush a big squeeze because you are DONE!
