

# A SEWING PATTERN BY

#### skeleton tie SEWING TUTORIAL

# Skeleton This project on its own is just a basic tie, simplified to be an easy tie

costume piece. The optional applique makes it look just like a ribcage and accompanying vertebrae -- perfect for Halloween!

DIFFICULTY:

MAKES:

Really simple! The appliqué is definitely the most difficult part, but even that can be skipped.

one tie that finishes 58" long

#### MATERIALS & TOOLS · 1 yd. of light to medium weight Appliqué supplies: (see alternatives fabric (light shirting or linen fabric in step 1) • 25" x 10" (or 1/3 yd.) of white would be perfect - I used a polyester suiting) appliqué fabric NOTE: You could also get away 25" x 10" (or 1/3 yd.) of light or with just 1/3-1/2 yd. if you're not heavyweight fusible web using a directional print and you Matching sewing thread Basic sewing tools (sewing machine, can cut the tie along the crossscissors, iron, needles, pins, fabric wise grain • 1/4 yd. of lining fabric (light cotton marker, seam ripper)

### BEFORE YOU BEGIN:

1. Print out the project pattern, pages 6-15

such as voile or lawn would be great I used a polyester lining fabric)

- 2. Assemble the printed pattern pieces
- 3. Lay out the pattern pieces on your fabric and cut them out
- 4. Mark the fabric pieces with the guidelines from the pattern

SEWING TUTORIAL

First of course is all the appliqué. I did mine by tracing the appliqué pattern onto lightweight fusible web, cutting out the

shapes, then ironing the fabric onto the tie according to the pattern guidelines. I then sewed it on with a zigzag stitch around all the shapes. You could also use heavyweight fusible web and skip the sewing altogether.

Alternatives include using the pattern as a freezer paper stencil and painting the ribcage, but one idea that I thought would look especially cool would be to bleach the fabric while using the skeleton stencil following this tutorial: http://melaniemjones.word-press.com/tag/skeleton-stencil/

Next we add on the facing sections for the points of the tie. For each lining bit, we need to finish the upper straight edge. I did a quick zigzag along the raw edge to finish it nicely, but after that you just need to do a simple singlefold hem. Fold it over by 3/8", iron it in place, then sew it down. Repeat this with your smaller facing section as well.

## skeleton tie

SEWING TUTORIAL

Now you can sew the facing to your tie. Line up the facing against the point of your tie with right sides together and sew around the sides and bottom edge. Leave the top free for turning it right side out in a bit. Trim the seam allowances, turn the tie right side out, the press the seam flat. Repeat this with the other end of your tie and the remaining facing piece.

To join the tie ends together, simply line up the diagonal seam found at the end of the tie halves. If you line them up with right sides together they should match up nicely and you can make a seam like usual. Be sure to press the seam open when you finish.

If you wanted to make this tie shorter, this is where you could make a quick and dirty adjustment. Simply trim off a few inches from this center section, making sure you cut parallel to the original seam line.

#### skeleton tie sewing tutorial

Just one more step to go!
To finish off your tie, fold the entire thing in half lengthwise to make a skinny strip. Line up the raw edges going along the edge of the tie, then sew down the entire length. Press the seam open, then turn the tie right side out. Give it one more press with the seam centered in the back of the tie, and you should have a nicely finished product!
