**CUT THE PATTERN**

- Remove the hoop from the machine and trim the threads. Rip off the water-soluble stabilizer and cut away the backing stabilizer. Align the **BODY SIDE (A)** pattern onto the embroidery, matching up the paper with the alignment stitching.
- Pin the paper pattern in place (or trace the outline). Cut around the pattern.
Use the fabric as usual with the rest of the project instructions.

HOOP YOUR FABRIC

- Hoop both of your fabrics layered together with right sides facing.
- Tear-away stabilizer works best for this to reduce bulk.
- There is no need to use any top stabilizer here.

STITCHING LINE

- Use a color that matches your main fabric for the best results here.

CUT THE FABRIC

- Remove the hoop from the machine and trim the threads. Rip off the water-soluble stabilizer and tear away the backing stabilizer.
- Trim the excess fabric about $\frac{1}{8}$ " away from the stitching line.
- Your piece may have an edge where the stitches get very long. This is the edge for the opening for turning. To turn the piece, cut just inside the stitches to cut them off. That will leave an opening for turning the fabric.
- Use the fabric as usual with the rest of the project instructions.
